Tech Topics Summary

HTML

HTML (HyperText Markup Language) is the standard language for creating web pages. It structures content using elements such as headings, paragraphs, and links.

CSS

CSS (Cascading Style Sheets) is used to control the layout and appearance of HTML elements. It supports colors, fonts, spacing, and animations.

Tech Topics Summary

TypeScript

TypeScript is a typed superset of JavaScript that adds static typing and interfaces. It helps catch errors early in development.

Next.js

Next.js is a React-based framework that enables server-side rendering and static site generation, ideal for performance-optimized web apps.

TypeScript

Tech Topics Summary

Python

Python is a high-level, versatile programming language known for its readability and support in areas like data science, web development, and automation.

Agentic AI

Agentic AI refers to intelligent systems that can act autonomously, understand tasks, make decisions, and interact naturally with users.

Tech Topics Summary

IT Technology

IT (Information Technology) includes all aspects of managing and processing information, including software, hardware, networking, and data security.

Mentor: Ameen Alam
